

# QUICK SET UP GUIDE

## SPS-2000 Dual Bluetooth® Active Rock Speakers

### BASIC SETUP OF THE SPS-2000 SPEAKERS:

1. Determine where the ideal location would be to place the speakers. For best performance place them 8-20' apart for stereo sound. **Don't place them where standing water can occur and become submersed as it will damage them and void the warranty.**
2. The master speaker has a power cord connected to an IP68 waterproof rated ac adapter power supply that needs to connect to an ac outlet. Make sure you are close enough with the master speaker to connect to the ac outlet. The speakers will stay on unless you have a switched outlet.
3. Connect the pairing speaker using the supplied 20' speaker cable into the proper connections on the master speaker.
4. When connecting the cable make sure to match the polarity to the master speaker. Positive + to positive + (Copper color lead) and - Negative to Negative - (silver color lead)

### CONNECT BLUETOOTH®

1. Make sure the speakers are plugged in and your Bluetooth® device is on. Go to settings or connections in your device and select **SA-Free Rok** in the menu to pair to. The device will show paired if successful. Only one device can be paired at a time.
2. Functions such as volume control will be controlled from your paired phone, tablet, other Bluetooth enabled device. It will not harm the speakers if they are left plugged in and left on.

**READ THE ENTIRE USER MANUAL FOR COMPLETE UNDERSTANDING OF THE PRODUCTS OPERATION**
